YACHT

We, as **Solen Marine Service**, are currently organizing the construction phase of a 41-meter yacht project on behalf of Magnolia Yachts. As part of this process, we are coordinating all technical procedures, supplier communications, and procurement activities to ensure that the project progresses in full compliance with the established engineering standards and construction timeline. We are also evaluating qualified manufacturers and solution partners for critical equipment and system integrations, aiming to secure the highest level of quality, reliability, and operational efficiency for the Magnolia yachts.
